

Praveen Suthar

AI-Focused Full Stack Developer

☎ +91-8861126969 | ✉ praveensuthar@gmail.com | 💻 praveensuthar08 | 🔄 Praveen-Suthar-08 | 🌐 Portfolio

Summary

Full Stack Developer focused on building **scalable web apps, AI-integrated platforms, and secure backend systems**. Experienced with **React/Next.js, Node.js/Express, FastAPI, REST APIs**, and **PostgreSQL/MySQL/MongoDB**. Strong focus on **clean architecture, backend optimization, deployments, and user-centric design**, delivering end-to-end solutions from frontend to production.

Highlights

- Built **5+ full-stack and AI projects** using **Next.js/React, FastAPI/Node.js, Prisma, PostgreSQL** with LLM/Vision integrations.
- Implemented **RBAC authentication**, background jobs, and security-focused flows across projects (validation, protected routes, API hardening).
- Top 0.5%** in PromptWars (Rank **242/48,682**) with AI Code Submission score **90.15**.

Skills

Languages: Python, JavaScript, **TypeScript**, Java, SQL, C

Frontend: HTML, CSS, React.js, Next.js

Backend: Node.js, Express.js, FastAPI, Django

Databases: PostgreSQL, MySQL, MongoDB, SQLite

AI/ML: Scikit-learn, Pandas, TensorFlow, Google Gemini API

Technologies: REST APIs, JWT Authentication, WebSockets, RBAC, Zod Validation

Deployment: Docker, Vercel

Platforms/Libraries: Supabase, Neon (PostgreSQL), Clerk

Tools: Git, GitHub, VS Code, Maven, Gradle

Experience

Cognifyx IT Solutions

Full Stack Developer Intern

June – July 2026

Remote | 2 Months

- Built a **CRUD dashboard** and **admin panel** covering user management and data-listing screens, using **HTML/CSS/JavaScript** and **Node.js/Express**, with REST APIs connected to **MongoDB/MySQL/PostgreSQL** for data persistence.
- Implemented a secure **authentication flow** (signup, login, protected routes) using **JWT** and server-side validation; **improved reliability** by adding centralized error middleware and consistent request validation across the API layer.
- Built a **file handling module** supporting document/image **upload and retrieval**, including file type/size validation and structured error handling for failed uploads.
- Optimized database queries for list/report screens using indexing and pagination; **improved reliability** and consistency of data retrieval across multiple linked tables.

Future Interns

Full Stack Web Development Intern

August 2026

Remote | 1 Month

- Implemented end-to-end UI-to-API integration for full-stack modules (multi-step forms, dashboards, admin actions), handling loading/empty/error states to **improve UX consistency** across screens.
- Contributed to a **payments-related flow** (checkout/request creation, status handling, confirmation UI) with secure API integration and structured handling of transaction states (pending/success/failure).
- Collaborated using **Git-based workflows** (feature branches, PR reviews) within a multi-person team, validating changes through manual testing before merging to staging.

Projects

ReLoop: AI-Driven Donation and Redistribution Platform (SaaS)

2026 (Ongoing) 🔄 GitHub

- Developing an **AI-powered SaaS platform** using **React.js, FastAPI, PostgreSQL** to connect surplus resources with individuals and communities in need.
- Implemented **intelligent resource matching and demand prediction** using **Scikit-learn and Pandas** to reduce resource-request mismatch during internal testing.

Elevate AI: Next-Gen AI Career Coach Platform

2026  GitHub

- Built a **full-stack AI career platform** using **Next.js 15**, **React 19**, **Prisma**, **Neon PostgreSQL**, and **Google Gemini 1.5 Flash** for resume enhancement, tailored cover letter generation, and adaptive interview quizzes.
- Implemented **automated industry insights** via Inngest background cron jobs for real-time salary trends and market analytics, secured with **Clerk authentication** and Zod-validated forms.

ApexAuto AI: Intelligent Car Marketplace & Test Drive Platform

2026  GitHub

- Built a **full-stack AI-powered car marketplace** using **Next.js 15**, **React 19**, **Prisma**, **Supabase** with **Google Gemini Vision AI** for image-based search — automatically detecting make, body type, and color from uploaded photos.
- Developed **real-time test drive scheduling** with conflict prevention, an admin KPI dashboard for fleet/revenue analytics, **Clerk-based RBAC**, and **ArcJet** security against bots and scraping attacks.

Class-Conditional GAN (CGAN) for CIFAR-10 Image Synthesis

2026  GitHub

- Built a **production-grade CGAN** using **TensorFlow/Keras** supporting both Minimax BCE and **WGAN-GP** loss formulations with mixed-precision FP16 training for accelerated GPU performance.
- Implemented **FID and Inception Score evaluation**, latent-space SLERP interpolation, and class morphing; deployed via a Streamlit UI and FastAPI inference microservice.

AI File Organizer: Autonomous File Intelligence CLI Tool

2026  GitHub

- Developed a **Node.js/TypeScript CLI application** that leverages multi-provider LLMs (**OpenAI**, **Gemini**, **Ollama**, **Grok**, **DeepSeek**) to auto-classify, rename, and organize files using vision and metadata extraction.
- Built a **real-time file watcher daemon**, terminal file manager (TUI), dynamic template engine with 100+ metadata placeholders, and a SQLite-backed version ledger with rollback support.

Certifications

- Oracle Cloud Infrastructure 2025 Certified AI Foundations Associate** – Oracle (2025)
- Generative Models for Developers** – Infosys SpringBoard (2026)
- Artificial Intelligence Primer Certification** – Infosys (2026)
- Agentic AI Saksham Program** – Capabl (2026)
- Web Development with AI Tools** – Edunet Foundation (2025–26)

Achievements

- Gemini Certified Student** – **University**, Google for Education / Google AI (Jan 2026 – Jan 2029): Demonstrated knowledge, skills, and basic competencies needed to use Google AI.
- Virtual: PromptWars – Rank 242 / 48,682**, Hack2skill (H2S) (2025–2026): Achieved an AI Code Submission score of **90.15**, ranking in the top 0.5% among 48,682 participants.

Education

B.E. in Computer Science
City Engineering College, Bangalore

Expected 2027
CGPA: 8.98

Relevant Coursework: Data Structures & Algorithms (DSA), DBMS, Operating Systems, Computer Networks, OOP, Big Data
